MAPA would like to thank Governor Mills along with State and local officials for their swift actions to limit the spread the COVID-19 virus. We are certainly in uncharted waters for the people of the State of Maine and for our industry. Please know that MAPA stands with the Governor on this effort during this difficult time and we are willing to help in any way possible.

Safety always has been and will continue to be the cornerstone of what we do as an industry and the COVID-19 virus has required swift attention by all of us. MAPA members have already put in place guidelines to keep our employees safe and limit exposure to COVID-19. We continue monitor the situation daily to ensure we maintain a safe workplace for ourselves and those we work with. We feel that we are able and ready to adapt as needed to ensure we continue to supply our services to the State as well as provide much needed jobs to our employees, their families, and the Maine economy.

Our members feel that we can responsibly accommodate the needed restrictions and encourage Governor Mills, and other State and local officials to allow our industry to continue to work as an essential industry to maintain critical infrastructure in the State of Maine.

Sincerely,  
Maine Board of Directors
